1. Claims 1, 2, 5 and 6 are objected to because of the following informalities: More particularly, in claim 1, line 2 after "and" insert -having-, and after "from" delete "a" and insert therefore -the-. In each of claims 5 and 6, line 2 of each, delete the comma.

Appropriate correction is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 5 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Renfrew et al, US 2,199,597. Note particularly page 1, lines 1-30, line 44-page 2, line 21. The reference discloses, in certain embodiments, a porous sheet impregnated with a suitable thermoplastic or thermoset resin having on an outer surface a powdery thermoset resin which can be (e.g. page 2, lines 19-21) either a phenolic or a urea based resin. Additionally, composites such as those set forth in claims 5 and 6 are also made therefrom (page 1, lines 13-30), which is substantially all that applicants' claims require.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note also Sprengling, Trunzo and the substance of JP 55-93612A which is discussed in a PCT Search Report.
